

Reflective Writing Assignment

There are four questions contained in this packet. Please answer all four to the best of your ability. These are NOT yes or no questions. This is a writing assignment. Each question is on a separate page so that you have adequate room to answer.

You are expected to write at least ½ page for each question. Less than ½ page will not be counted as a “finished” writing assignment and will not be posted as completed. This will count as 1 hour of your service learning experience.

Failure to turn in your written assignment and your time log sheet for your service hours by the deadline given to you will result in your hours not being posted.

If you have any questions or need any help with these questions, please feel free to call or stop by my office or speak to Ms. Hendricks.

Thank You for helping to make service learning a stronger Cowley program.

Michelle Knoles

1. Please define the term “civic responsibility.” You may use any source such as a dictionary or a credible web resource. Please list your resource(s).

2. Please write about where you chose to do your service learning. If you have more than one site, choose one to write about. What did you do there? What is the purpose of the organization? Why did you choose this particular site? Does it have anything to do with what you intend to do when you graduate from college? Ask questions while you are working at your site! It lets the organizers know you are interested.

3. Please describe in as much detail as possible how what you did at your site relates to your civic responsibility.

4. In what way(s) does your service learning connect to your learning in your Psychology class? Have there been any concepts that you have learned in class that you could apply to your service work? If you are working with children, look at ways in which they learn. Does it follow what you are learning in class? Do you see any correlations? Really think about this one!
