473.00 - IMMUNIZATION POLICY

Cowley College requires all students living in residential housing to receive the meningitis vaccine or sign a waiver indicating their knowledge of the risks of bacterial meningitis and their decision not to be vaccinated. It is strongly recommended that all students become knowledgeable about meningitis and consider vaccination in order to reduce their risk.

In addition to the meningitis, some international students must also complete a Tuberculin screening. Students can provide proof of a Tuberculin screening from their healthcare provider or through campus Health Services.

Cowley College, along with the Kansas Department of Health and Environment, and the Center for Disease Control, strongly recommends all students be immunized against tetanus, diphtheria, hepatitis B, varicella, polio, measles, mumps, and rubella. Questions about immunizations should be directed to campus Health Services or local health departments.
