

# Cowley Write It Build It

## **Description:**

This is a 2 part event. In the first part, one team member will view a constructed object (constructed from laboratory equipment) and write a description (15 minute maximum time allowed) of how to build it without using any pictures, diagrams, or symbols. The written description will then be given to their teammates (1 or 2) who have not seen the object. Given a corresponding set of materials, the team members will then attempt to rebuild the object from the written description. (maximum time allotted for this phase will be 10 minutes.)

## **Materials:**

Team members **MUST** bring a writing instrument.

Event Leaders will provide paper to write on, the object, and corresponding sets of materials.

## **Scoring:**

High Score wins. Points are earned for correct connections, placement, color, etc. Ties will be broken by shortest construction phase.
